

TURBINE SL WHEELS

LIGHTWEIGHT AND TRAIL READY

Maximize your XC and Trail riding experience with the Turbine SL wheelset. Rolling on a tough, welded 6069 alloy tubeless-ready rim with a 25mm internal width, and laced to our tried and true Vault hub with its fast 3-degree engagement, oversized hub shell for increased stiffness and wide bearing stance for durability. This wheelset is light enough for XC epics but totally happy to tackle all those aggressive lines on your Trail adventures. No need to choose between light or strong wheels for your trail bike – the Turbine SL does both!

HUB FEATURES

- Large oversized flange for improved bracing angle and larger bearings.
- Wide bearing stance.
- 6 double tooth pawls (3 engage at a time).
- 120 points of engagement (3 degrees).
- Individually sprung pawls.
- One length spoke used throughout wheelset (F&R).
- Tool-free interchangeable end caps (sold separately).
- Low drag labyrinth cassette body seal.

RIM FEATURES

- Alloy 6069 Welded rim
- 25mm Internal Width
- Tubeless Ready Rim (Tape and valves installed)
- 3mm Offset improves spoke tension balance and wheel stiffness
- High gloss black logos that are interchangeable with aftermarket color decal kits.
