

COOPER BIKES

# Our History

Cooper Bikes is the bicycle division of the Cooper Car Company, which designed the original MINI Cooper. In 1959 and 1960 Cooper won two Formula One championships, an achievement inspired by an individual who opted to ignore conventional wisdom and did things his own way. Since then, Cooper has become synonymous with innovation and a game changer in terms of performance engineering. This is a company that has gone against the status quo by making excellence accessible to the masses and left its mark in history.

Using the latest technologies, including electrification, Cooper's goal is to redefine urban transport with the ability to generate speed, load carrying capacity, easy hill climbing and comfort on all terrains.

Built from legend - made for the future

COOPER BIKES

## BACK TO THE ROOTS

# CS-1E

## Singlespeed

Less is more. The High-End steel frame and Reynold's tubing make the Cooper CS-1E a real eye-catcher in the urban jungle. Reduced to a bare minimum, the lightweight Singlespeed-Bike with Zehus rear-hub-motor almost accelerates like an automobile. Thanks to Gates CDX belt drive, the CS-1E is not only nearly maintenance-free and clean, but also remarkably quiet when pedalling.

### FRAME

Cooper Reynolds Steelframe

### MOTOR

Zehus Bike Gen2, 250W, 40 Nm

### BATTERY

Zehus integrated, 173 Wh

### BELT

Gates Carbon Drive CDX

£ 2,199  
(RRP, incl. VAT)

## URBAN UNDERSTATEMENT

# CL-7E

## Classic Ladies

With its graceful Berceau geometry and super-light CroMo frame, this bike exudes style and riding comfort in equal measure. With its hub motor and integrated Li-ion battery, the CL-7E is barely recognisable as an e-bike. Thanks to the recuperation mode of the KERS technology, the battery is recharged during the ride - a hybrid drive with range guarantee.

## LEGEND ON THE ROAD

# CG-7E

## Classic Gents

Our CG-7E is the urban companion for all those who love beauty in detail. With its 250 watts of extra power, the lightweight bike accelerates to a comfortable city speed in no time and glides quietly through the urban jungle.

£ 2,499  
(RRP, incl. VAT)

## TIME TO BREAK OUT

# CR-7E

## Randonneur

Time to leave the city's boundaries: With its lightweight CroMo steel frame, the modern Cooper CR-7E is your ideal companion for long and short trips away from the city. Innovative and long-lasting components around the almost completely hidden Zehus motor create a clean and modern look. With KERS technology, the battery is recharged while riding, allowing for longer ranges.

### FRAME

Cooper Steelframe (CrMo 4130)

### MOTOR

Zehus Bike Gen2, 250W, 40 Nm

### BATTERY

Zehus integrated, 173 Wh

### REAR DERAILLEUR

Microshift XLE, 7-speed
